DETAILED ACTION

The following is an examiner's statement of reasons for allowance:

The closest art in this case are the patents to Marlow et al, Treutelaar, Price, Blatt, Monila, Haskel and Spencer.

As for claims 20 and 32, prior art does not teach the structure as recited in combination with a sling assembly and a tongue formed between a first groove and a second groove (with structure connected to the connector as recited), the tongue having a raised portion near the second end of the tongue, the raised portion being adapted to frictionally engage the inside surface of the first base or the inside surface of the second base when the tongue is released from a tensioned position thereby allowing the raised portion of the tongue to contact the inside surface of the first base or the inside surface of the second base when the connector is inserted into the first base or the second base.

As for claims 24, 30 and 31, prior art does not teach the structure as recited in combination with a sling assembly and a T-connector having a base portion and a perpendicular portion, the base portion of the T-connector being adapted to allow insertion of the second end of the horizontal frame such that the T-connector rotates freely about the horizontal frame, and the base portion of the T-connector defining a second pair of opposing apertures adapted such that the second pair of opposing apertures can be aligned with the first pair of opposing apertures in the horizontal frame, the perpendicular portion of the T-connector defining a hollow space to receive the

second end of the connector, and a pin adapted to slide into and pass through the first pair of opposing apertures in the horizontal frame and the second pair of opposing apertures in the base portion of the T-connector to secure the T-connector in a desired position relative to the horizontal frame.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huong Q. Pham whose telephone number is (571) 272-4980. The examiner can normally be reached on 6:30 AM - 3:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Huson can be reached on (571) 272 - 4887. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
